

Pattern Blocks & Tangrams

Shapes that fit together

1. Fill the hexagon

How many green triangles cover one hexagon? Fill it in, then write the number.

It took _____ green triangles.

Can you fill it a *different* way (some triangles, some bigger pieces)? I found _____ different ways.

2. Tile with no gaps

Keep adding shapes so they cover everything: **no gaps, no overlaps**. That is called a *tiling*. Fill this strip with hexagons and triangles:

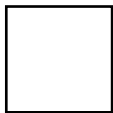

3. Which shapes leave a gap?

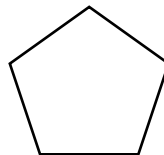

Try fitting copies of each shape around one point. Circle the ones that leave a **gap** (they will not close up):

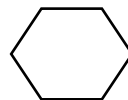

triangle

square

pentagon

hexagon

The shape that leaves a gap is the _____.

4. Tangram: make a picture

A tangram is one square cut into **7** pieces. Use all seven, flat, no overlaps. Draw a cat, a boat, a rocket, or a person in this box:
